

Please remember:

Traffic management helps protect our people who are working close to traffic.

Please take care when driving through roadworks and help ensure their safety.

A11 Fiveways roundabout

Birds eye view of Fiveways roundabout

We will do our best to minimise disruption for drivers and communities while we are working.

About the A11 Fiveways roundabout signalisation scheme

In autumn 2018 we will make improvements to the A11 Fiveways roundabout. The scheme aims to reduce congestion during peak times and will take approximately 11 weeks to complete.

The works will deliver benefits to Highways England's strategic road network and will improve local access to the A11.

This scheme is a package of short-term measures to improve congestion while a longer-term solution to upgrade the junction is being considered in a future Road Investment period, beyond 2020.

Works being carried out

- Traffic lights will be installed on approaches to the A11 Fiveways roundabout from A11 north, A11 south and A1101 west.
- The speed limit will be reduced to 40mph on A11 south bound approach towards Newmarket. This will help road users, by giving them more time to react to merging and slowing traffic.
- The speed limit will be reduced to 50 mph on the A11 north approach from Thetford.
- All road markings on the approaches to the roundabout will be renewed. This will help to clarify which lanes vehicles need to be in when approaching the roundabout.
- Directional signs will be relocated to give drivers more advanced notice and improve the visibility of the signs.
- New signs will be added where required.

Traffic Management

To reduce disruption to the local community during the works, we will use a mixture of lane closures with speed restrictions and full road closures. The traffic management will change depending on what works are taking place. During full road closures traffic will be diverted via the A134, A1088 and A143.
